

Unleash the power of the cloud and make your office equipment the gateway for web-hosted document collaboration

- Anywhere, anytime document access from your mobile device or desktop
- A rich cloud experience that optimizes user productivity
- Direct scanning into the cloud from your Multifunctional device
- True cross platform support for any major browser
- Seamless collaboration with external users through direct integration with DropBox

As the next generation of ECM technology, GlobalSearch C2 is a managed cloud infrastructure, extending the reach of your document management installation. GlobalSearch C2 is optimized to deliver anywhere, anytime access, regardless of your web platform. From any modern browser, through your desktop or mobile device, GlobalSearch C2 keeps the flow of your business information moving.

GlobalSearch C2 leverages Amazon Web Services (AWS) for cloud based computing to increase your productivity through efficient management of your documents. With GlobalSearch C2 your documents are always secure, always backed up and always available.

Store with Confidence Durability 99.999999999%	There When You Need It 99.99% Availability
Scalability Store as much data as you want	Security 256-bit Advanced Encryption

Capture to the Cloud

Turn your Multifunctional device into the centerpiece for cloud capture. Scan directly to GlobalSearch C2 through Secure FTP or leverage the power of GlobalCapture to create workflows through an array of tools for automating your scan processes from the MFP.

Extend Your Access

Enjoy untethered access to your documents on the go no matter where you are in the world. GlobalSearch C2 provides secure access to your business content through your mobile device or modern browser. GlobalSearch C2 delivers flexibility in performance to keep your business moving forward.

Work with Your Documents

The inherent strength of GlobalSearch C2 is that it allows you to work with your documents faster and easier than you would with a hard copy in hand. Navigate through pages, adjust orientation, view and edit index data, add an annotation or even apply your signature in just seconds.

FAQs

<p>What is GlobalSearch C2?</p>	<p>GlobalSearch C2 is the new cloud hosted document management system, running on Square 9's GlobalSearch platform, providing users with a proven technology already used by businesses throughout the world for improving document efficiency.</p>
<p>What are the benefits of using the C2 Platform?</p>	<p>GlobalSearch C2 simply and elegantly provides users with untethered access to their documents no matter where they are in the world through a platform that's optimized to deliver a desktop experience through the browser. Your documents are always secure, always backed up and always available.</p>
<p>What operating system can GlobalSearch C2 run on?</p>	<p>As a true cross platform application, GlobalSearch C2 will operate on any mobile device. GlobalSearch C2 allows you to easily switch between devices regardless of whether it's a Mac or PC because it runs on any modern browser.</p>
<p>Where are my GlobalSearch C2 documents stored?</p>	<p>GlobalSearch C2 leverages the strength of Amazon Web Services (AWS) for hosting your documents. This is the same secure platform used by Salesforce.com, SAP, Spotify and many other SaaS providers to host your critical data.</p>
<p>Are my documents secure in GlobalSearch C2?</p>	<p>Absolutely! We understand the critical nature of document security so in addition to securing access to your records, GlobalSearch C2 also uses one of the strongest block ciphers available, 256 bit Advanced Encryption Standard (AES-256) for standing encryption of your documents at rest. When in transit, the Secure Socket Layer (SSL) protocol protects the transfer of your documents through a combination of public key and symmetric-key encryption.</p>
<p>Can I edit documents in GlobalSearch C2?</p>	<p>Of course! GlobalSearch C2 provides a full set of document editing capabilities including highlighting, redactions, sticky notes and even a fully ESIGN compliant tool for applying "wet signatures" with your finger or mouse. With the proper credentials, you can even download your documents from the cloud, work with them locally and then insert the new version when you're done. You're previous copy will be saved for future reference with the updated revision.</p>
<p>How do I capture documents to GlobalSearch C2?</p>	<p>You can handle one off documents or small batches through GlobalSearch C2's drag & drop or import capabilities. GlobalSearch C2 can also be tied directly for scanning from your copier through a secure FTP (SFTP) connection. For organizations handling bulk capture of documents, including scanned images or email, GlobalSearch C2 leverages Square 9's GlobalCapture for batch pre-processing where documents can be automatically separated, indexed and converted to text searchable PDFs before releasing to GlobalSearch C2.</p>
